

# DAWIT TESHAGER

Software Engineer

## PROFILE

Diligent and experienced software engineer with expertise in Golang and .NET backend technologies. Passionate about solving problems and driving innovation in advanced environments. Eager to join a dynamic team and deliver high-quality solutions for global clients. Committed to continuous learning and collaborative success.

## EXPERIENCE

Backend Developer, at ESKALATE

January 2023 – July 2023

- Worked as a backend developer from January to July, utilizing .NET (dotnet) technologies.
- Contributed to the development of a comprehensive portal for the A2SV community using dotnet and following Clean Architecture principles.
- Implemented CI/CD practices, automating testing and deployment pipelines for streamlined development, ensuring code quality and efficient delivery.
- Acquired proficiency in using .NET framework (dotnet) and associated tools to enhance portal functionality.

Backend Developer, at SantimPay.

September 2022 - January 2023

- Worked as a Golang backend developer at Santipay, a payment provider company.
- Developed and maintained backend services using Golang to support the payment platform.
- Contributed to the integration of payment gateways and external APIs to enhance payment processing.
- Leveraged Golang's concurrency features for optimized performance and scalability.
- Collaborated with cross-functional teams to deliver secure and efficient payment solutions.

## EDUCATION

Bachelor of Science  
Software Engineering  
Addis Ababa University , Ethiopia  
September 2017 – April 2023

Relevant Coursework:

- Advanced Software Development
- Database Systems
- Software Testing and Quality Assurance
- Data Structures and Algorithms

Data Structures and Algorithms, A2SV  
September 2022 – Present

- In-depth knowledge of data structures and algorithms.
- Applied problem-solving skills through projects and coding challenges.

## SKILL

- Python
- API Development
- Golang
- .NET
- Docker
- Clean Architecture
- Problem-Solving
- CI/CD (Continuous Integration and Continuous Deployment)
- Collaboration
- Innovation
- Version Control (e.g., Git)
